**WATER CONSERVATION POLICY**

EFFECTIVE FROM: 04.07.2022

**AIM**

The objective of water conservation policy is to promote sustainable use of water resources by reducing water consumption and minimizing waste. The policy aims to ensure that water resources are used efficiently and effectively to meet the needs of present and future generations.

**POLICY SCOPE**

The policy is applicable for all Teaching, Non – teaching faculty, Administrative staff, Students and Parents.

**POLICY DETAILS**

Water conservation is the practice of minimizing the use of water and making sure it is used efficiently. It can involve reducing water consumption through practices such as taking shorter showers, using efficient plumbing fixtures and appliances, and making sure that the taps are not left running. It can also involve protecting bodies of water from pollution and preventing water waste through proper water management and conservation initiatives.

**OBJECTIVES OF THE POLICY**

- To provide clean, safe and reliable drinking water all the time.
- To increase water availability through recycling.
- To enable water storage and propose conjunctive management of surface and ground water.
- To guard against contamination of ground water resources.
- To manage sedimentation and control excessive corrosion.
- To protect, restore and rehabilitate the habitat for species protection.
- To protect, restore and rehabilitate watershed and inlet process.
- To provide for groundwater recharge while protecting groundwater resources from overdraft.
- To minimize point source and non-point source pollution, including chemical efficiency.
- To collaborate with local land, water, waste water, and storm water agencies, project, proponents, and other stake holders to develop policies, ordinances, and programs that promote water management goals, as well also identify areas for integration.

**CONCLUSION**

The implementation of water conservation policy is essential for protecting our water resources and preventing water shortages in future.
